

BORGESON

Steering You Forward

#990051 1965-1966 Mustang SBF 289/302/351W Clutch Equalizer Bar for Borgeson P/S Box

Installation notes:

- 1) This clutch linkage installs in the stock location with all stock hardware. Due to the mechanical limits of our CNC equipment it will be necessary to grind a small amount off the steering box casting as shown below.

To use this replacement clutch linkage with the Borgeson power conversion box it will be necessary to grind the small area shown to properly clear the tube of the equalizer bar.
